

Deaths

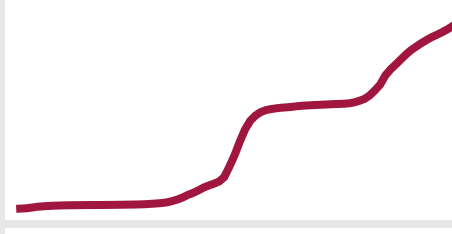

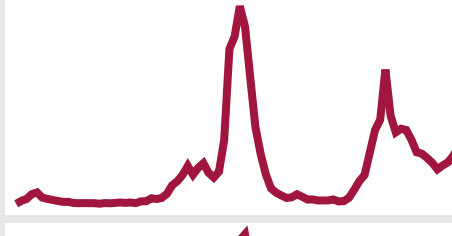

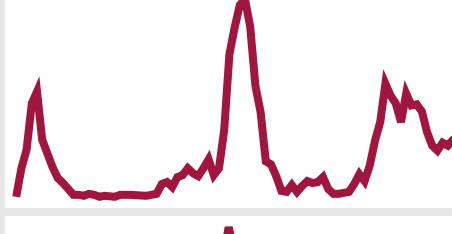

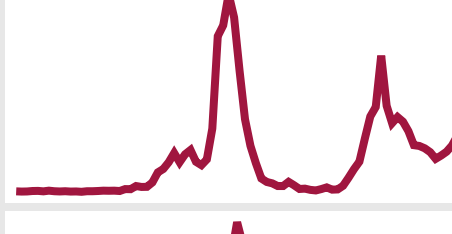

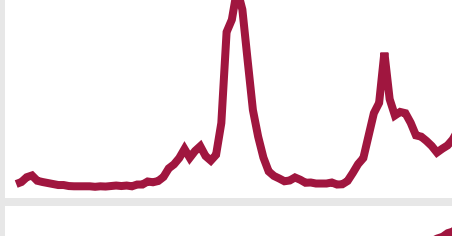

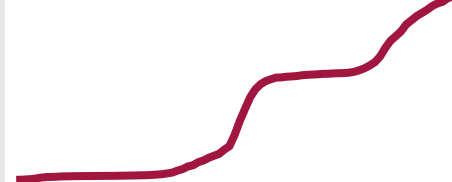

Metric Name	Last Week	This Week	Difference	Trend
1. Number of Covid-19 deaths	2	1	-1	
2. Cumulative Number of Covid-19 deaths	394	395	1	
3. Excess deaths	-2.2	-7.0	-5	

This Week: 08/11/2021 - 14/11/2021

Last Week: 01/11/2021 - 07/11/2021

This week there has been one new death from Covid-19 which has increased the total number of Covid-19 deaths to 395. Looking at all causes of death, there were fewer deaths this week than in the same week the previous year.

Cases

Metric Name	Last Week	This Week	Difference	Trend
4. Cumulative number of cases	27,899	28,468	569	
5. Number of cases	454	569	115	
6. Number of Pillar 1 cases	54	73	19	
7. Number of Pillar 2 cases	400	496	96	
8. Incidence per 100,000 population	183	229	46	
9. Cumulative case rate	11,159	11,281	122	

This week 569 cases of Covid-19 were diagnosed. Of these, 73 were diagnosed through Pillar 1, and 496 through Pillar 2. This has increased the total number of Covid-19 cases to 28,468.

Vaccinations

This Week: 08/11/2021 - 14/11/2021
 Last Week: 01/11/2021 - 07/11/2021

Metric Name	Last Week	This Week	Difference	Trend
10. Number with first dose, aged 12-15	2,091	2,216	125	
11. Proportion received first dose, aged 12-15	24.6%	26.1%	1.5%	
12. Number with first dose, aged 16+	155,765	156,251	486	
13. Proportion received first dose, aged 16+	63.7%	63.9%	0.2%	
14. Number with first dose, aged 16-49	105,845	106,282	437	
15. Proportion received first dose, aged 16-49	57.8%	58.1%	0.2%	
16. Number with first dose, aged 50+	49,920	49,969	49	
17. Proportion received first dose, aged 50+	81.0%	81.1%	0.1%	

A total of 158,467 1st dose vaccinations have been administered to date. This is a change of 611 from the previous week.

Vaccinations

This Week: 08/11/2021 - 14/11/2021

Last Week: 01/11/2021 - 07/11/2021

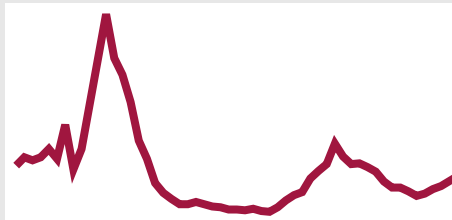

Metric Name	Last Week	This Week	Difference	Trend
18. Number with second dose, aged 12-15	10	15	5	
19. Proportion received second dose, aged 12-15	0.1%	0.2%	0.1%	
20. Number with second dose, aged 16+	141,478	142,114	636	
21. Proportion received second dose, aged 16+	57.8%	58.1%	0.3%	
22. Number with second dose, aged 16-49	93,723	94,275	552	
23. Proportion received second dose, aged 16-49	51.2%	51.5%	0.3%	
24. Number with second dose, aged 50+	47,755	47,839	84	
25. Proportion received second dose, aged 50+	77.5%	77.6%	0.1%	

A total of 142,129 2nd dose vaccinations have been administered to date. This is a change of 641 from the previous week.

This Week: 08/11/2021 - 14/11/2021

Last Week: 01/11/2021 - 07/11/2021

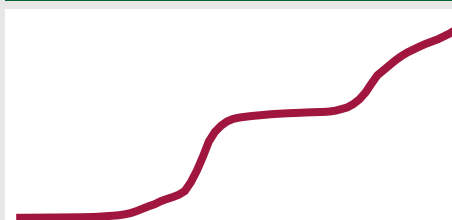

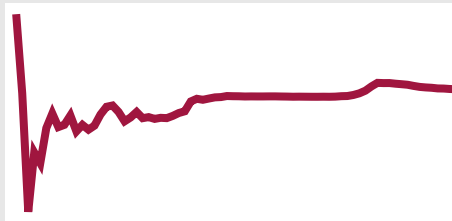

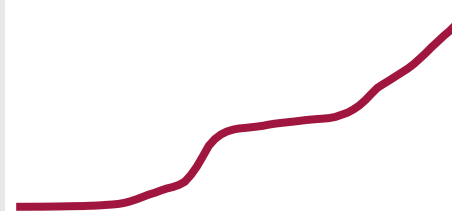

Testing

Metric Name	Last Week	This Week	Difference	Trend
26. Percentage of individuals who tested positive	4.9%	5.6%	0.7%	
27. Individuals tested per 100,000 population (includes pillar 1&2 tests)	548.5	577.0	28.5	

This week the Covid-19 testing rate is 577, per 100,000 residents. This has increased from last week's rate of 548.5 per 100,000.

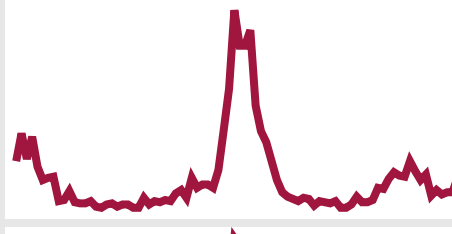

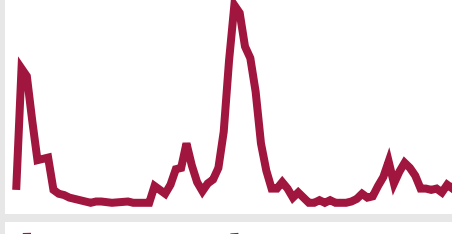

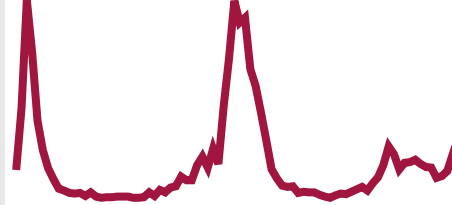

The positivity rate for recorded tests is 5.60% which has increased from last week.

Contact Tracing

Metric Name	Last Week	This Week	Difference	Trend
28. Number of cases via NHS Test and Trace (cumulative)	24,111	24,498	387	
29. Proportion of cases successfully contacted (cumulative)	86%	86%	-0.2%	
30. Number of contacts via NHS Test and Trace (cumulative)	53,769	55,251	1,482	

To date there have been 24,498 cases contacted through the Test and Trace system with a success rate of 86%. This has led to the notification of 55,251 contacts.

Other data

Metric Name	Last Week	This Week	Difference	Trend
31. UCLH NHS Trust Hospital new admissions (weekly)	20	35	15	
32. Whittington Health new admissions (weekly)	19	9	-10	
33. Royal Free London NHS Foundation Trust new admissions (weekly)	49	60	11	

This Week: 08/11/2021 - 14/11/2021

Last Week: 01/11/2021 - 07/11/2021

This week there have been 104 admissions to local hospitals due to Covid-19. This has increased from the past week.

Metric Name	Last Week	This Week
34. R Number for London	0.8 to 1.0	0.9 to 1.1

Notes

1 - Number of Covid-19 deaths: Due to time taken to process deaths data, figures are presented with a one-week delay.

2 - Cumulative number of Covid-19 deaths: Due to time taken to process deaths data, figures are presented with a one-week delay.

3 - Excess deaths: Due to time taken to process deaths data, figures are presented with a one-week delay.

8 - Incidence per 100,000 population: This indicator is RAG rated: Maroon >250 cases per 100,000, Dark red 151 to 250 cases per 100,000, Red 51 to 150 cases per 100,000, Amber 25 to 50 per 100,000, Green 150 cases per 100,000

26 - Percentage of individuals who tested positive: This indicator is RAG rated Red >7.5%, Amber 4% to 7.5%, Green. This indicator uses PHE's adjusted approach to testing metrics. Individuals with a positive test are deduplicated across the pandemic. Individuals with a negative test are deduplicated across the preceding 7 days, to exclude repeat negative tests arising from recent multiple testing

27 - Individuals tested per 100,000 population (includes pillar 1&2 tests): This indicator uses PHE's adjusted approach to testing metrics. Individuals with a positive test are deduplicated across the pandemic. Individuals with a negative test are deduplicated across the preceding 7 days, to exclude repeat negative tests arising from recent multiple testing

31 - UCLH NHS Trust Hospital new admissions (weekly): New cases with Covid-19 to main trust providers that serve local residents. Admissions may not be our residents.

32 - Whittington Health NHS Trust Hospital new admissions (weekly): New cases with Covid-19 to main trust providers that serve local residents. Admissions may not be our residents.

33 - Royal Free London NHS Foundation Trust hospital new admissions (weekly): New cases with Covid-19 to main trust providers that serve local residents. Admissions may not be our residents.

34 - R Number for London: The estimate for the R number is updated on a slower timescale than other indicators. Low case numbers and/or a high degree of variability in transmission across the region means these estimates are insufficiently robust to inform policy decisions.

Regional estimates were paused in late October, while the Health Security Agency investigated the impact of an incident that resulted in a large number of false negatives in some regions.
